

Preprints

Phosphorylation of TTL3 by BIK1 Functions as a Molecular Switch to Control Cellulose Biosynthesis under Salt Stress

Francisco Percio, Raquel Pagano-Marquez, Angel Del Espino, Leia Colin, Jiamin Luo, Jessica Pérez-Sancho, Ryan Toth, Thomas A. DeFalco, Jian-Min Zhou, Alberto P. Macho, Cyril Zipfel, Lourdes Rubio, Staffan Persson, Vitor Amorim-Silva, Miguel A. Botella

bioRxiv 2026.06.25.734577; doi: <https://doi.org/10.64898/2026.06.25.734577>

Plasma membrane nanoscale dynamics of Arabidopsis leucine-rich repeat receptor kinase complexes

Michelle von Arx, Marie-Dominique Jolivet, David Biermann, Vaishali Gabani, Steven S. Andrews, Cyril Zipfel, Julien Gronnier

bioRxiv 2026.03.05.709869; doi: <https://doi.org/10.64898/2026.03.05.709869>

The Receptor Kinase MEE39/ATHE Mediates Cell Wall Integrity Surveillance During Root Vascular Pathogen Infection

Juan Carlos Montesinos, Marina Martín-Dacal, Hsin-Yao Huang, Gloria Sancho-Andrés, Fortesa Rama, Laura Carrillo, Anurag Kashyap, Álvaro Jiménez-Jiménez, Francisco M. Gámez-Arjona, Caroline Broyart, Huanjie Yang, Nuria S. Coll, Julia Santiago, Cyril Zipfel, Clara Sánchez-Rodríguez

bioRxiv 2026.03.05.708959; doi: <https://doi.org/10.64898/2026.03.05.708959>

Xhelilaj K, von Arx M, Biermann D, Paronov A, Faiss N, Monte I, Pireddu P, Klingelhuber F, Zipfel C, Timmerman M, Oecking C and Gronnier J (2026) An ancient alkalization factor informs Arabidopsis root development. Nature Plants, under review.

Originally posted on bioRxiv: <https://doi.org/10.64898/2025.12.22.695669>

Creff A*, Rhodes J*, Salaün C, Larive J, Bayle V, Turley E, Nobori T, Figueiredo DD, Landrein B, Zipfel C# and Ingram G# (2026) An embryo-derived peptide signal directs endosperm polarity in Arabidopsis. Science, under revision. *Equal contributions. #co-corresponding authors

Originally posted on bioRxiv: <https://doi.org/10.64898/2025.12.11.693621>

Jiménez-Sandoval P, Johannndrees O#, Snoeck S#, Harshith CY#, Omary M#, Broyart C#, Rhodes J, Bender KW, Zipfel C*, and Santiago J* (2026) Disulfide bond sculpts a peptide fold that mediates phytocytokine recognition. *Nature Plants*, under revision. #equal contributions. *co-corresponding authors

Originally posted on bioRxiv: <https://doi.org/10.1101/2025.10.24.684422>

Jacobs BCIC, Bender KW, Six E, Zipfel C, Knight MR (2026) An elevated environmental temperature impairs accumulation of the pattern recognition receptor FLS2. *Plant Cell*, under revision.

Originally posted on bioRxiv: <https://doi.org/10.1101/2025.10.20.683271>

Ramirez VE, Shuai H, Hazarika RR, Tao CN, Choi S, Hwu FY, Wudy S, Albertos P, Gigl M, Bagnol J, Brajkovici S, Piecy RS, Dawid C, Enard W, Vlot C, Gutjahr C, Parniske M, Kuster B, Sieberer T, Ludwig C, Zipfel C, Ton J, Johannes F & Poppenberger B (2026) Brassinosteroids epigenetically repress plant immunity. *PNAS*, under revision.

Maroschek J, Rösger Y, Rössner C, Snoeck S, Becker A, Schwechheimer C, Zipfel C and Hükelhoven R (2026) MIK2 clade receptor function in perception of a *Fusarium*-derived elicitor is conserved among different plant families. *New Phytologist*, under revision.

Originally posted on bioRxiv: <https://doi.org/10.1101/2025.05.22.655486>

Weber H, Ehinger A, Kolb D, Fallahzadeh-Mamaghani V, Halter T, Franz-Wachtel M, zur Oven-Krockhaus S, Gronnier J, Zipfel C, Harter K, and Kemmerling K (2026) *Arabidopsis* HYPERSENSITIVE INDUCED REACTION 2 affects plasma membrane receptor pathways and organization. *EMBO J.*, under revision.

Originally posted on bioRxiv: <https://doi.org/10.1101/2025.04.11.648320>

Bergum M, Sklenar J, Hernández-Pinzón I, Green P, Taylor J, Smoker M, Allen M, Thind A, Moon H, Zipfel C, Rhodes J, Faulkner C, and Moscou MJ (2026) Putative neofunctionalization of a Poales-specific EXO70 clade. *Plant Physiology*, under revision.

Originally posted on bioRxiv: <https://doi.org/10.1101/2024.12.13.628418>

Dou R, Castel B, Tanney CAS, Bredow M, Miguel VN, El Mahboubi K, Chu J, Melkonian K, Rodriguez Gallo MC, Lauressergues D, Keller J, Gonçalves-Dias M, DeFalco TA, Uhrig RG, Zipfel C, Delaux PM, and Monaghan J (2026) Divergent roles of CPK28 in immune homeostasis across land plants. *MPMI*, under review.

Originally posted on bioRxiv: <https://doi.org/10.1101/2024.10.01.61612>.

Montesinos JC, Huang HY, Sancho-Andrés G, Gámez-Arjona FM, Rama F, Kashyap A, Broyart C, Yang H, Coll NS, Santiago J, Zipfel C and Sánchez-Rodríguez C (2026) The receptor kinase ATHENA/MEE39 controls plant defense against vascular pathogens and responses to cellulose alterations. *Cell Host Microbe.*, under review.

Zhai K, Derbyshire P, Zhang S, Choi S, Wang L, Song B, Kinoshita T, Zhou JM, Menke FLH, Bender KW, and Zipfel C (2026) A phosphorelay circuit drives extracellular alkalinization in receptor kinase-mediated immune and cell wall damage signaling. *Molecular Cell*, in press.
